

8-Channel Digital Input Module 24 V DC

High-side switching, 2-conductor connection

The 2-conductor digital input module provides 8 channels at a width of just 12mm (0.47in).

It receives binary control signals from digital field devices (e.g., sensors, encoders, switches or proximity switches).

The module has Push-in CAGE CLAMP® connections enabling solid conductors to be inserted directly.

Each input channel has a noise-rejection RC filter with 3.0ms or 0.2 ms time constant.

A green LED indicates the switched status of each channel.

An optocoupler provides electrical isolation between the bus and the field side.

An operating tool with a 2.5mm blade (210-719) is required to open the Push-in CAGE CLAMP® connections.
