AF09-40-00-12 48-130V50/60HZ-DC Contactor
AF09 4-pole contactors are used for controlling power circuits up to 690 V AC and 440 V DC. They are mainly used for controlling non-inductive or sli ghtly inductive loads (i.e. resistance furnaces...). AF... contactors include a n electronic coil interface accepting a wide control voltage Uc min. ... Uc m ax. Only four coils cover control voltages between $24 \ldots . .500 \mathrm{~V} 50 / 60 \mathrm{~Hz}$ or 2 $0 . . .500 \mathrm{~V}$ DC. AF contactors can manage large control voltage variations. One coil can be used for different control voltages used worldwide without any coil change. AF contactors have built-in surge protection and do not re quire additional surge suppressors. The AF... series 4-pole contactors are of the block type design. - Main poles and auxiliary contact blocks: 4 N.O. main poles, front and side-mounted add-on auxiliary contact blocks (mecha nically-linked auxiliary contacts compliant with Annex L of IEC 60947-5-1. N.C. mirror contacts compliant with Annex F of IEC 60947-4-1) - Control cir cuit: AC or DC operated - Accessories: a wide range of accessories is avail able.
