Catalog Description: T16-5.7 Thermal Overload Relay

Long Description: The T16-5.7 thermal overload relay is an economic electromechanical protection device for

the main circuit. It offers reliable and fast protection for motors in the event of overload or p hase failure. The device has trip class 10. Further features are the temperature compensat ion, trip contact (NC), signal contact (NO), automatic- or manual reset selectable, trip-free mechanism, STOP function and a trip indication. The overload relays are connected directly to the mini contactors or block contactors. Single mounting kits are available as accessor

у.
