Catalog Description: MS116-0.16 Manual Motor Starter

Long Description: The MS116-0.16 manual motor starter is a compact 45 mm width devices with a rated oper

ational current of le = 0.16 A. This device is used to manually switch on and off motors and to protect them reliably and without the need for a fuse from short-circuits, overload and ph ase failures. The manual motor starter offers a rated service short-circuit breaking capacity lcs = 50 kA at 400 VAC and the trip class 10A. Further features are the build-in disconnect function, temperature compensation, trip-free mechanism and a rotary handle with a clear switch position indication. The manual motor starter is suitable for three- and single-phase applications. Auxiliary contacts, signalling contacts, undervoltage releases, shunt trips, 3-p hase bus bars, power in-feed blocks and locking devices for protection against unauthorize

d changes are available as accessory.
