Double-deck terminal block, 2022 Series, Push-in CAGE CLAMP®

This double-deck terminal block (item number 2022-2204) provides hassle-free electrical installations. Pluggable rail-mount terminal blocks are primarily found in switchgear units and control systems, most notably in railroad technology. These innovative systems combine the benefits of rail-mount terminal blocks and connectors for a flexible and reliable wiring system. You also have the option of pre-assembling installations, which not only makes production but also installation, operation, and maintenance more efficient and cost-effective. The double-deck terminal block also functions as a through terminal block. Our pluggable rail-mount terminal block is rated for 690 V and is designed for use with a rated current of up to 24 A. Conductors can only be connected to this double-deck terminal block if their strip length is between 10 mm and 12 mm. Featuring conductor terminals along with Push-in CAGE CLAMP®, this product delivers reliable performance. Push-in CAGE CLAMP® connection technology is ideal for connecting all conductor types. It allows direct insertion of both solid and fine-stranded conductors with ferrules without needing to use any tools—all thanks to its pluggable design. Depending on the conductor type, this double-deck terminal block is designed for conductor cross sections ranging from 0.25 mm² to 4 mm². It has two levels. Two potentials can connect using the two clamping points The blue housing is made of polyamide (PA66) for insulation. This pluggable rail-mount terminal block is operated with an operating tool. These pluggable rail-mount terminal blocks are mounted using DIN-35 rails.. You can connect copper conductors thanks to front-entry wiring. The four jumper slots enable potential distribution to other clamping points.

Notes			
Safety Information		A separator plate (Item No. 209-191) or a 10 mm end stop (Item No. 249-117) must be placed at the end of a WAGO X-COM®S-SYSTEM terminal strip.
