Double-deck terminal block, 2202 Series, push-button

This double-deck terminal block (item number 2202-2701) is designed for hassle-free electrical installations. The double-deck terminal block also serves as a through terminal block. Ensure that the strip lengths are between 10 mm and 12 mm when connecting conductors to this double-deck terminal block. Featuring conductor terminals along with Push-in CAGE CLAMP®, this connector is highly versatile. Push-in CAGE CLAMP® technology provides a universal connection solution for all conductor types. It allows both solid and fine-stranded conductors with ferrules to be inserted directly into the clamping point without the need for tools. This double-deck terminal block is suitable for conductor cross sections ranging from 0.25 mm² to 4 mm². It has two levels. Two potentials can connect using the four clamping points The gray housing is made of polyamide (PA66) for insulation. These through rail-mount terminal blocks are mounted using DIN-35 rails.. This product is designed for specific Ex applications (please refer to the product datasheet).
