PCB terminal block, 737 Series, operating tool

Quick and easy connections are guaranteed with this PCB terminal block (item number 737-408). You can rely on tried and tested safety with these PCB terminal blocks, perfect for a wide variety of applications when designing your devices. This PCB terminal block has a rated voltage of 320 V and can handle currents up to 21 A, making it suitable for high-load applications. Ensure that the strip lengths are between 5 mm and 6 mm when connecting conductors to this PCB terminal block. This product features one conductor terminal and utilizes CAGE CLAMP®. Our renowned universal connection known as CAGE CLAMP® is industry-leading when it comes to connection technology and electrical interconnections. The dimensions are 41.64 x 44 x 31 mm (width x height x depth). This PCB terminal block is suitable for conductor cross sections ranging from 0.08 mm² to 2.5 mm². It features three levels and twenty-four clamping points for connecting twenty-four potentials / 24 poles. The orange housing is made of polyamide (PA66) for insulation, the contacts are made of electrolytic copper (ECu), and the clamping spring is made of chrome-nickel spring steel (CrNi). The contact surface is coated with tin. An operating tool is used to operate this PCB terminal block. The PCB terminal block is designed for THT soldering. Insert the conductor at a 45° angle.. The solder pins measure 0.7 x 0.7 mm in cross-section and 4 mm in length and are organized within the terminal block (staggered). There are one solder pin per potential.
