## Installation Notes

Installation

Snapping tap-off and spacer modules together to assemble a multipole tap-off module (max. 10 poles).

The tap-off module assembly can be directly plugged into the jumper contact slot of the current bar. The terminal blocks can also be commoned via push-in type jumper bars parallel to the jumper slots being used by the modules.

Conductor termination

CAGE CLAMP® connection
Tap-off modules are used when additional or removable connections are required (can be used as a permanent connection or a test plug).
Wiring is possible whether the modules are plugged into the assembly or not.
Security

Using anti-reverse mating modules at both ends of a module assembly prevents reverse mating.

Three anti-reverse mating modules are necessary when snapping more than seven tap-off modules together.

Testing

Testing is also possible using a pre-wired tap-off module assembly in the very same way as test plugs.

Marking

Module assembly with CAGE CLAMP® connections (0.25 ... 2.5 mm²/24 ... 14 AWG), including strain relief plate and marker slots for Mini-WSB or WMB markers.
