

u-link remote access service - a tool for every situation. Special Offer!

Let's connect.

Extended functions for convenient remote access management

Weidmüller 

Buy one of our versatile routers and get a FREE u-link remote access licence for one year!

1. u-link Remote Access

u-link guarantees fast and secure access to machines and systems and at the same time, enables efficient management of production systems, user clients, access rights or firmware versions.

The intuitive u-link web portal can be configured quickly and easily without expert knowledge and adapted to specific processes. Secure servers in Europe offer an online platform that ensures conformity between different IT systems when performing remote maintenance

Weidmüller Industrial Security Routers

- Easy integration of subnets with identical IP address ranges through 1:1 NAT
- Secure and easy remote maintenance with Weidmüller u-link remote access service
- Future-proof network connection with static and dynamic routing
- Increased network security through stateful inspection firewall, IP/Port-forwarding and network segmentation
- Secure communication over the Internet by using IPsec and OpenVPN
- Reliable internet connection, even without on-site internet access, thanks to integrated 4G/LTE cellular modem
- Full flexibility thanks to Fast Ethernet and Gigabit Ethernet interfaces ranging from 2 up to 6 ports.
- Select devices offering activating / de-activating a u-link VPN tunnel via 24 VDC digital input

2. Industrial Security Router

Get more for less!

Offer valid until 31st December, 2020.

- Licence configuration up to 50 router devices
- Extensive functional and performance features as compared with the entry version, such as:
 - 3 simultaneous VPN through-connections per customer account (can be extended)
 - China-VPN: reliable VPN connection to and from China
 - Firmware management: Display of firmware status of all routers and the option of a time-controlled, automated firmware update
 - Individual access rights: Configurable access rights to devices in the target network
 - Extensive event log: Presentation of all activities in the u-link portal with extensive filter and export functions
 - Password policy: Increased security through configurable specification of minimum requirements for password quality and validity period
- Additional VPN connections extension
 - Licence code can be used with all standard versions
 - Additional data volume with guaranteed bandwidth
